WHY A LIFTING APP?

Your digital guide in all matters relating to lifting loads.

Have you experienced the following situation? You have to lift a valuable load, but there are a few points you want to check just to be on the safe side.

- Is the lifting point the right one?
- Is the sling chain configured correctly?
- What do I have to bear in mind when checking lifting means?
- I need a certificate – where can I get it?

Naturally you are short of time, you cannot get hold of the specialist and spending a long time researching the issue is not an option. Does this seem familiar? We developed BUDDYtron for precisely this kind of situation. On the following pages, you will find out how our app can provide you with quick, easy yet professional support in your daily routine.

Best contacts: BUDDYtron and NFC.

BUDDYtron uses NFC technology to identify your lifting means for checks or to retrieve information. The same technology that you can use to pay with your smartphone when you go shopping. You just need to hold your mobile phone over the RUD product's blue RFID transponder – the little blue “dot” that you will find on many RUD products.

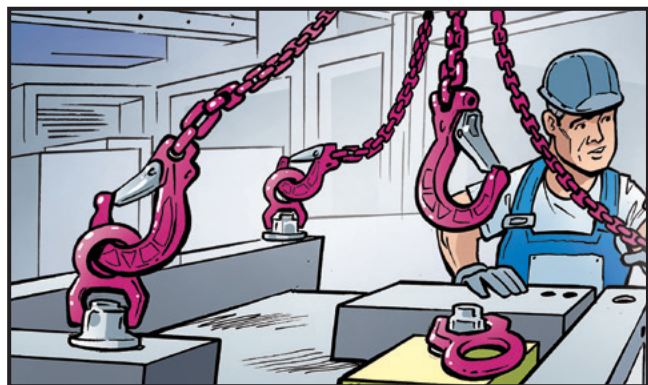

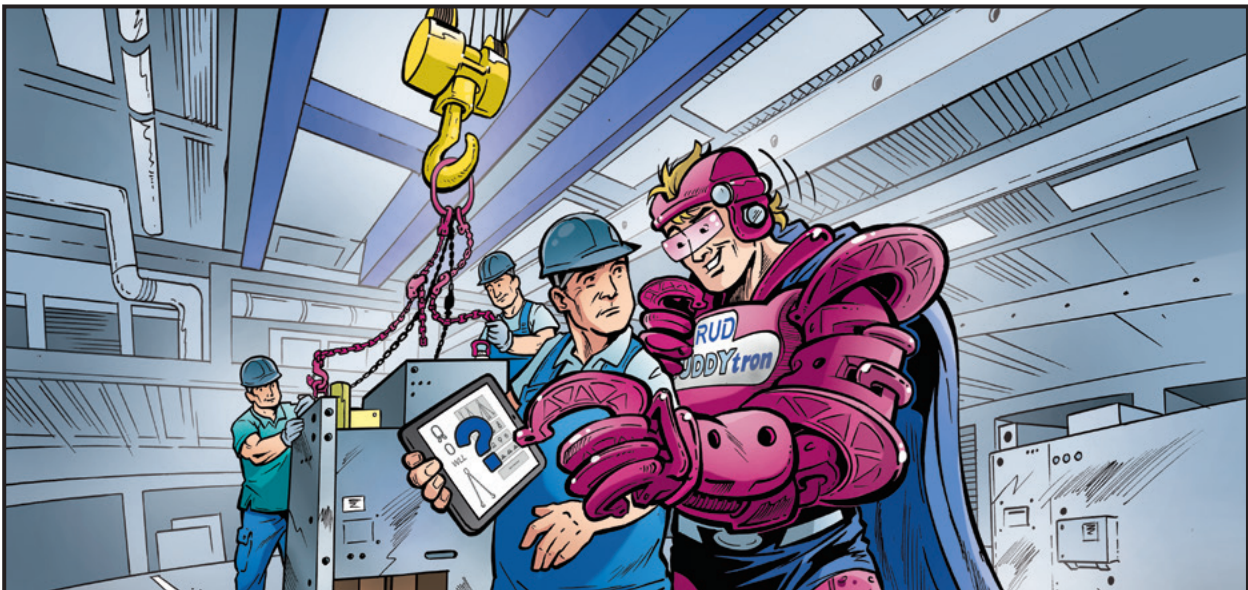

With NFC technology.

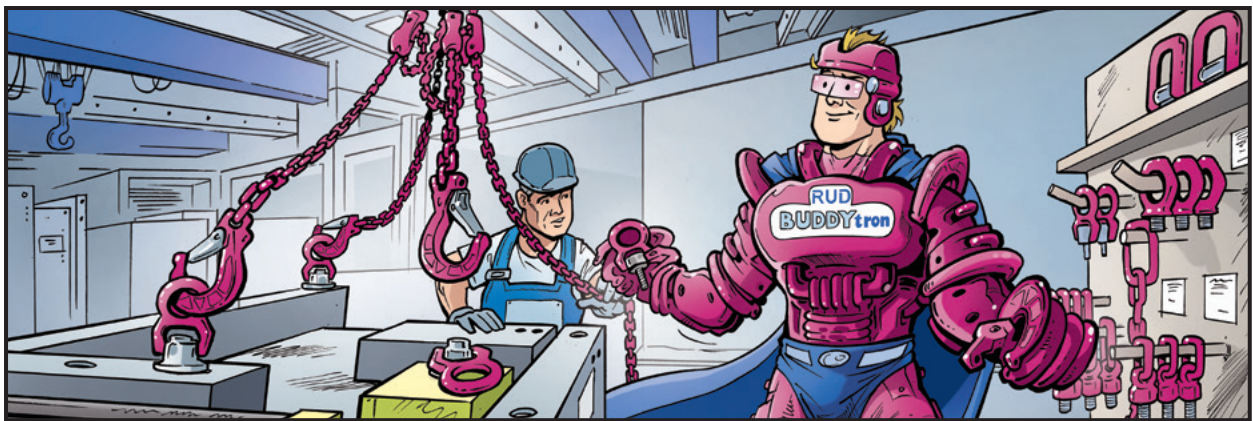

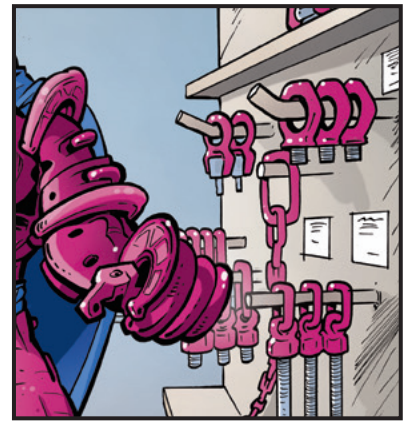

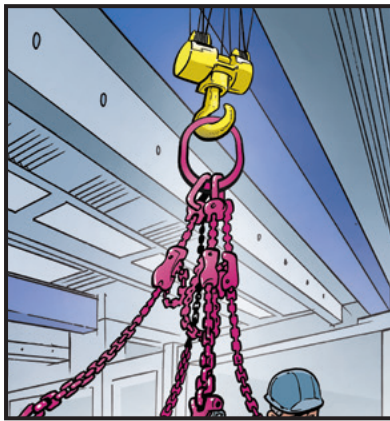

Scan RFID and know more.

RUD BUDDYtron is the digital assistant that will support you in almost all lifting situations. At any time – wherever you are. With our innovative app, you will instantly receive practical lifting information from RUD that can be used immediately, enabling you to make your work safer and more efficient.

How the new app will support you:

- It will give you confidence that your lifting means and lifting points are just right for your loads.
- It will provide a lot of useful information about your lifting means and lifting points.
- It will provide you with tips for assembly, dismantling and repairs.
- It will help you to check the condition of your lifting means and lifting points.
- It is easy and convenient to use – even with one hand.

With NFC technology.

Scan RFID and know more.

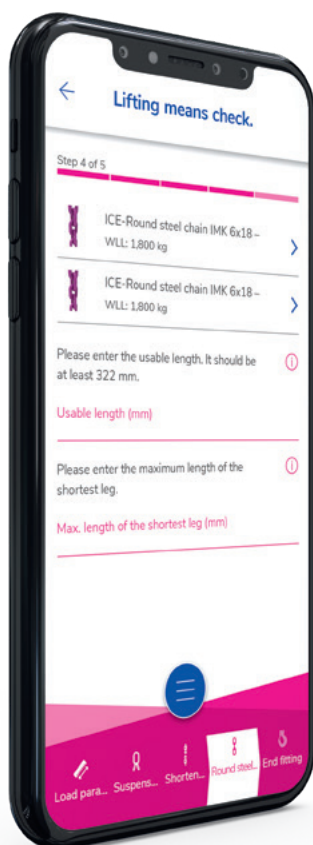

How it works:

Hold the NFC interface of your smartphone with 1–2 mm distance to the RFID transponder of the product (blue dot). Or use the product search in the menu below.

Not available on older devices.

> 1–2 mm <

LIFTING MEANS CHECK WITH RUD BUDDYtron.

It is this simple.

Would you like to make sure that your lifting means is correctly configured for the load that you are to lift? Or would like to check in advance whether the lifting point that you are planning to install is suitable for the load? Not a problem with BUDDYtron and RFID technology. Use your mobile to scan the small blue transponder at the RUD component using NFC and enter the necessary parameters in just a few clicks. This tells BUDDYtron which lifting means you want to use. Then you can start the check, and the app will tell you whether everything is in order within seconds.

The advantage for you:

You will receive assurance about whether the RUD lifting point is right for the load or the components of your RUD sling chain go together.

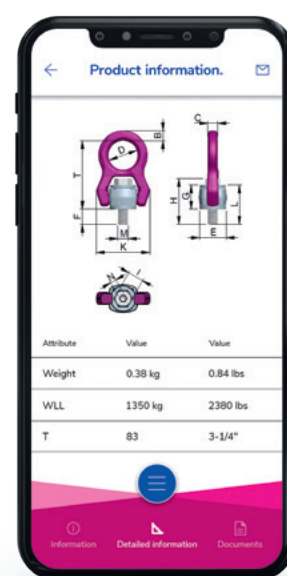

RETRIEVE PRODUCT INFORMATION AND INSTRUCTION MANUALS WITH RUD BUDDYtron.

This is how fast it can be.

Would you like to know the working load limit (WLL) or other technical data of a RUD lifting point quickly? Do you want to download the instruction manual for a RUD product and bring it up on the display? Not a problem. With BUDDYtron, you will find the information that you are looking for quickly thanks to the NFC scanner in your mobile phone. Or you can simply select the required document to be displayed.

The advantage for you:

You will have practically any document about a RUD lifting means or lifting point ready to hand in seconds.

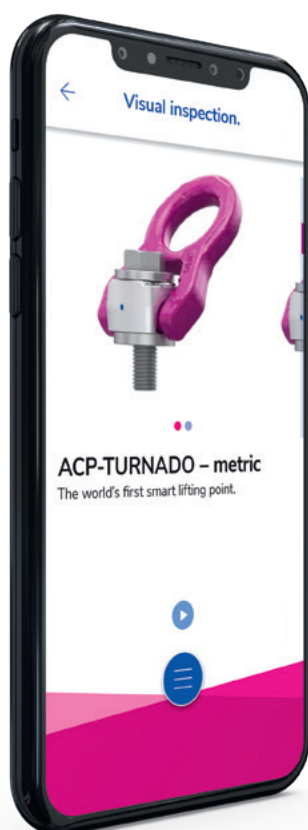

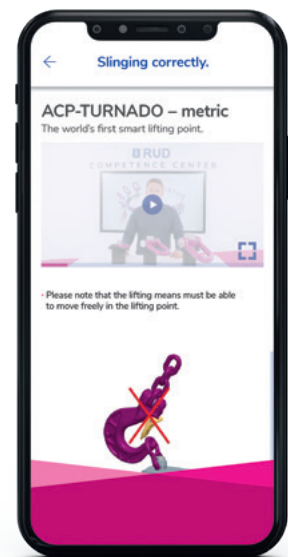

TIPS AND TRICKS FOR RUD BUDDYtron.

How to do it right.

Do you need practical information about the assembly, use, dismantling or repair of a RUD lifting point, for example, right where you are? Or do you want to know what you need to bear in mind to lift loads correctly? RUD BUDDYtron is your reliable guide. Illustrated instructions and videos from RUD will give you useful suggestions and tips that you can put into practice straightaway.

The advantage for you:

You will have complete confidence at all times when it comes to using RUD lifting means and lifting points.

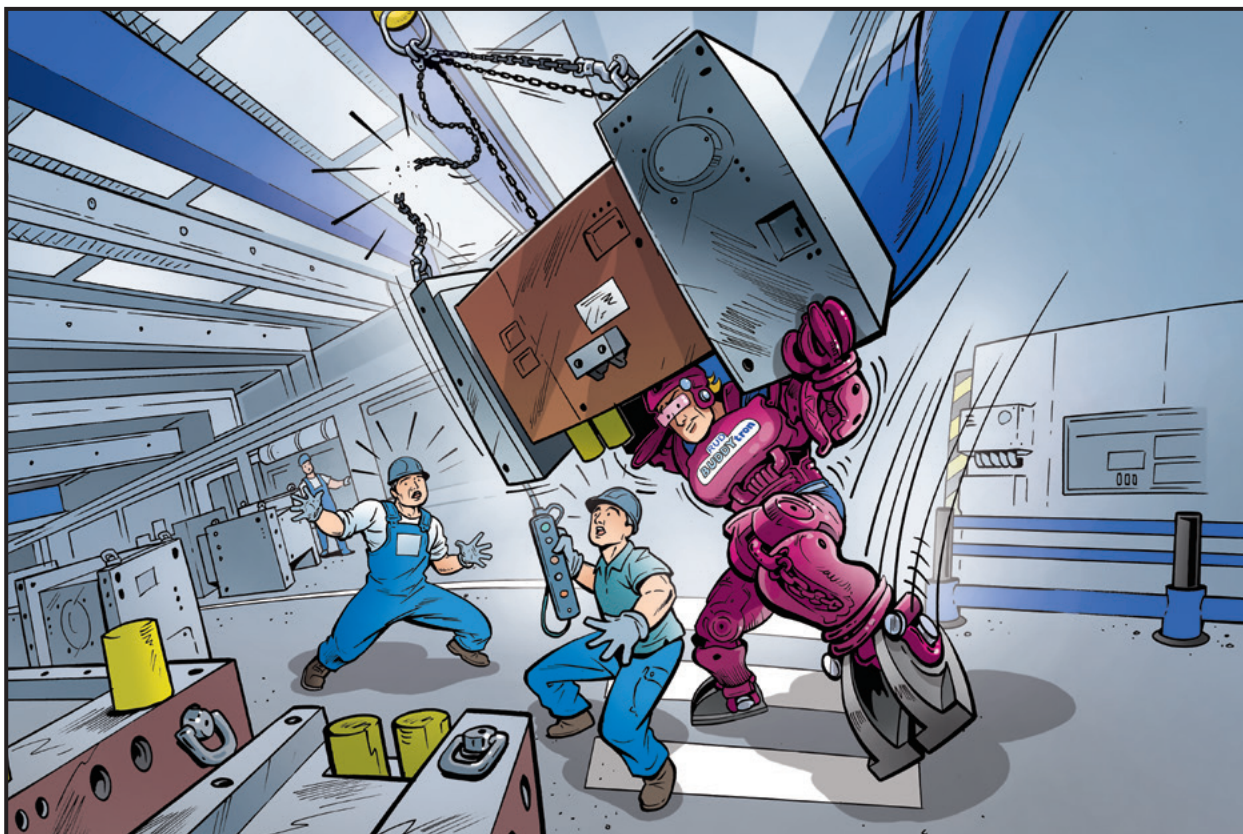

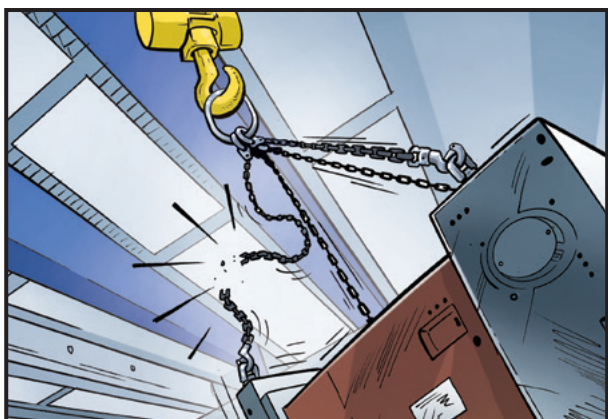

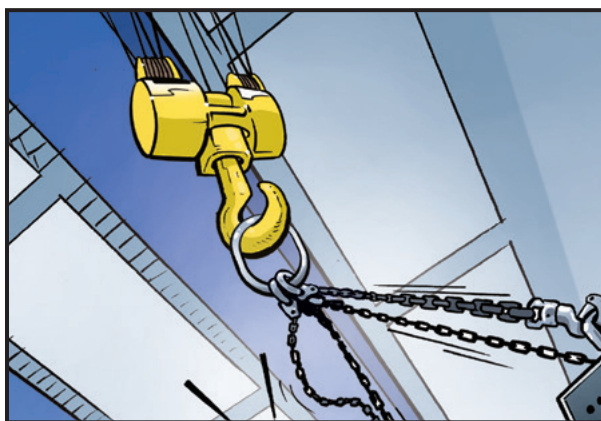

VISUAL INSPECTION WITH RUD BUDDYtron.

You have questions? Call your RUD consultant directly from the app.

As you know, you should examine a lifting means closely before using it to be on the safe side. BUDDYtron will give you practical tips and advice for this important task. If you have questions about the condition of a lifting point, for example, you can call a RUD consultant directly from the app and send them a photo of the product if applicable. This enables you to get valuable feedback on the spot.

The advantage for you:

You will get feedback on the condition of a lifting means in a very short time and rapidly gain more confidence.
